

# Software Version 1.3.16

## Installation Instructions

### Connect Tablet to Internet

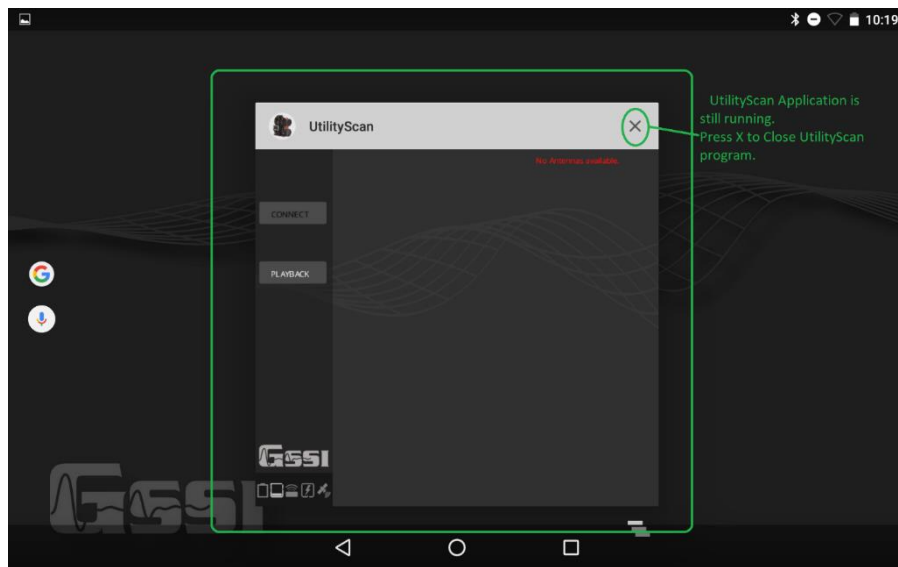

- 1) Connect Tablet to an Internet connection. *(We recommend connecting the Tablet via ethernet to avoid any issues when re-connecting to your antenna. If you decide to use Wifi, make sure to forget Wifi connection after updating the UtilityScan application)*
  - For Panasonic B2: There is a full sized ethernet port on the device
  - For Nvidia Shield, Lenovo Tab 4 & Panasonic A2: Use ethernet Micro USB or USB Type-c adapter supplied with UtilityScan system

### Make Sure UtilityScan Application is Closed

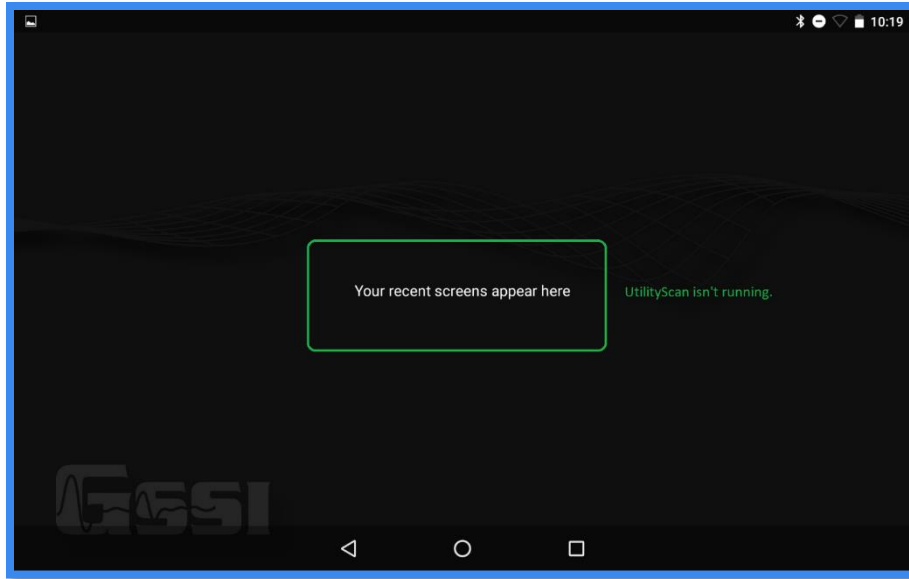

- 1) When on Home Screen press the square button on the bottom Navigation bar. *(If you don't see the square button, swipe up from bottom of the screen to reveal navigation bar)*

2) Make sure UtilityScan isn't open. If UtilityScan is open and running, make sure to X out program to stop UtilityScan before continuing.

*UtilityScan application is still running. Close out program before continuing.*

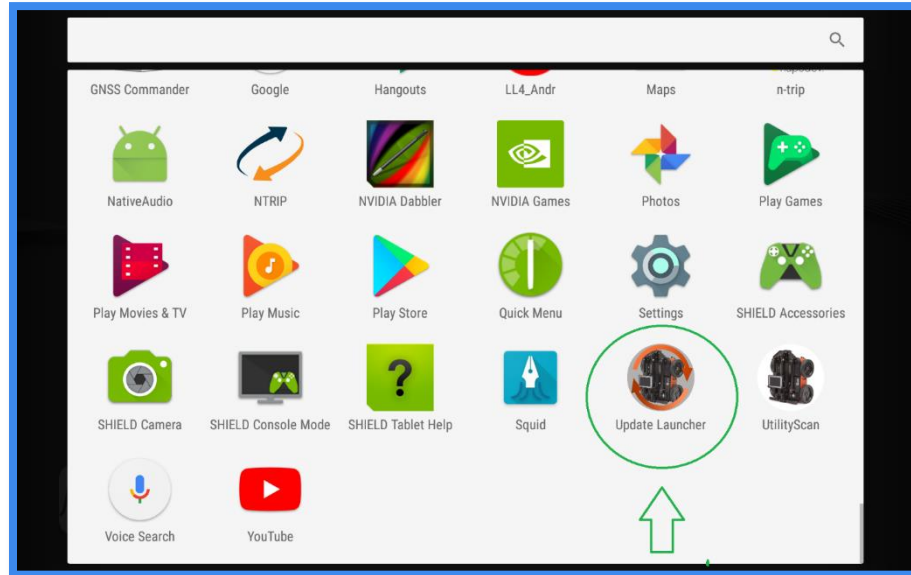

*UtilityScan application is not running. Good to continue.*

## Open Update Launcher Application

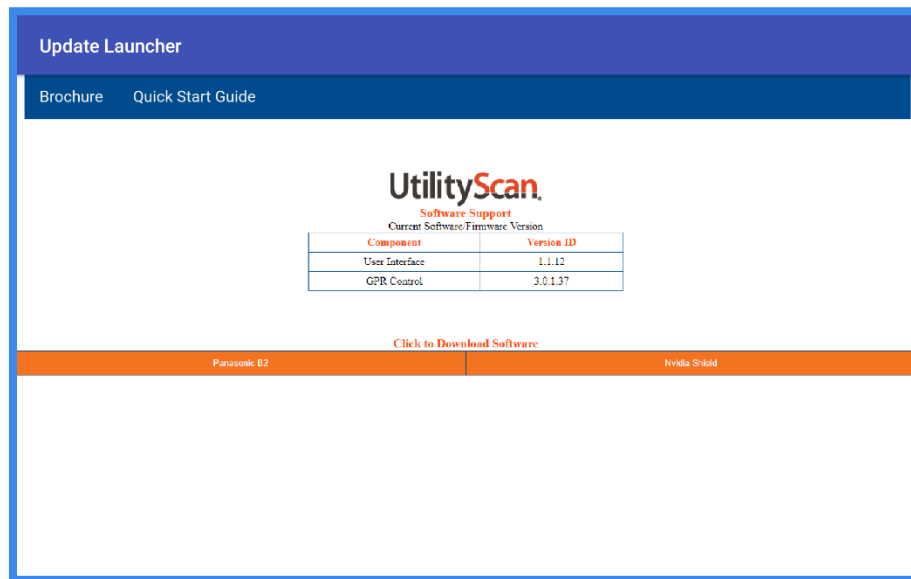

- 1) Open Applications menu to navigate through installed applications on your Android device.

- 2) Click on the Update Launcher icon to launch the application. *Note: If you don't have the UtilityScan 'Update Launcher' you can go to Chrome and enter 'utilityScan.serives' into the address bar.*

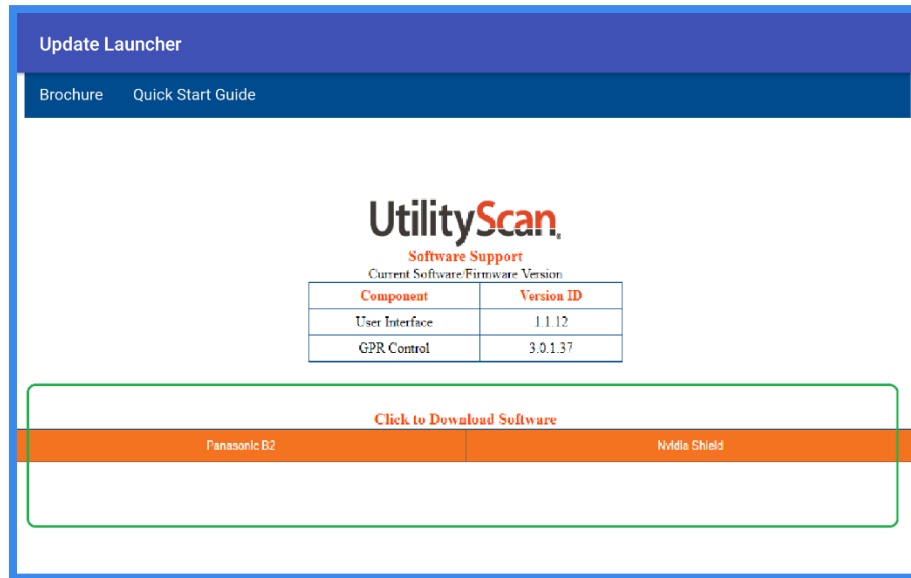

- 3) Update Launcher application will open.

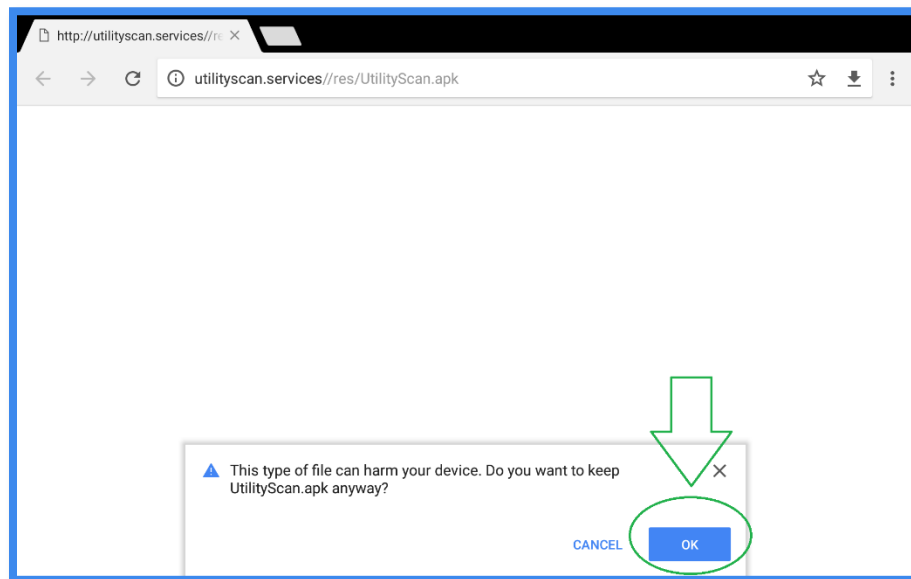

## Installing UtilityScan Application Update

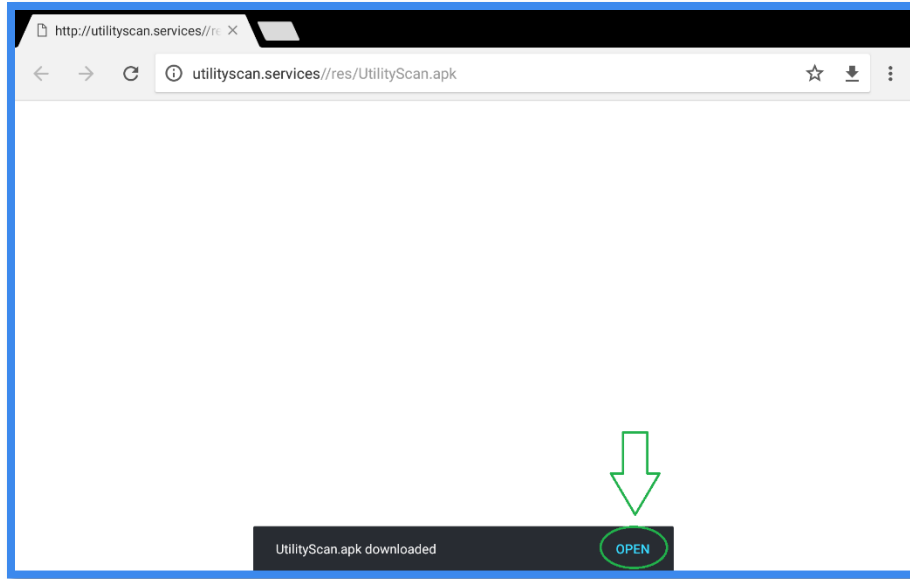

- 1) Press button to download software, depending on what tablet you're using. If you are unsure of your tablet model, check the font bezel or back of the device for identification info.

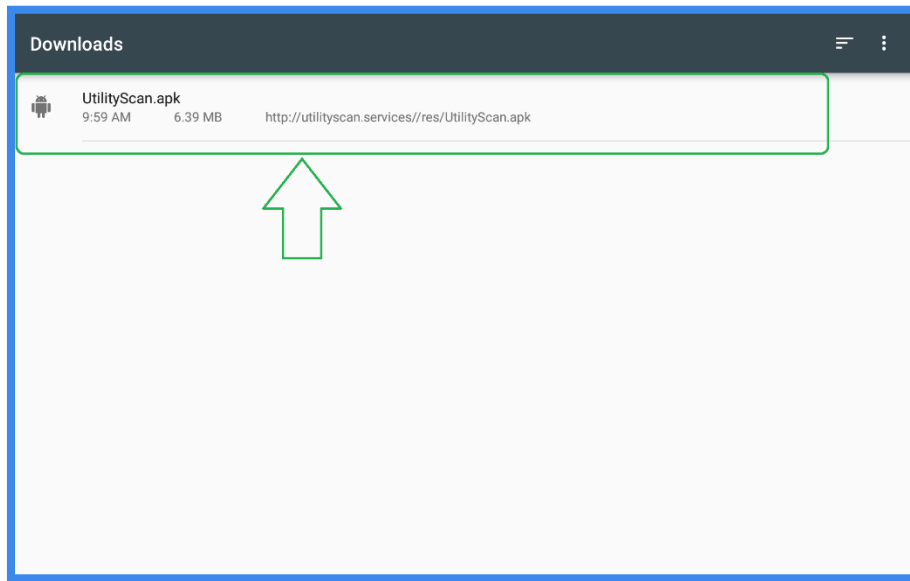

- 2) Press OK when prompted to start download.

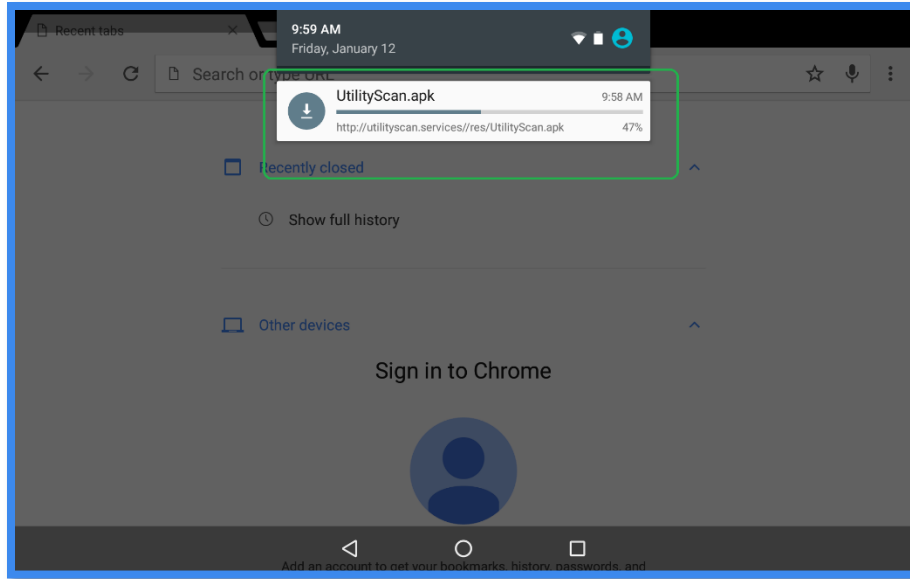

- 3) Once download completes press OPEN to start installation.

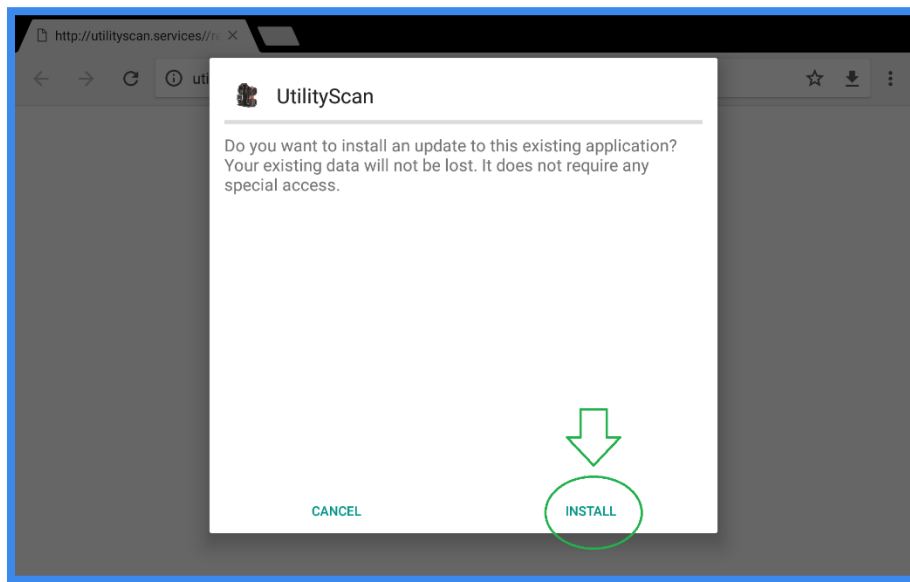

Notes: You may be prompt to the Downloads folder after hitting the open.

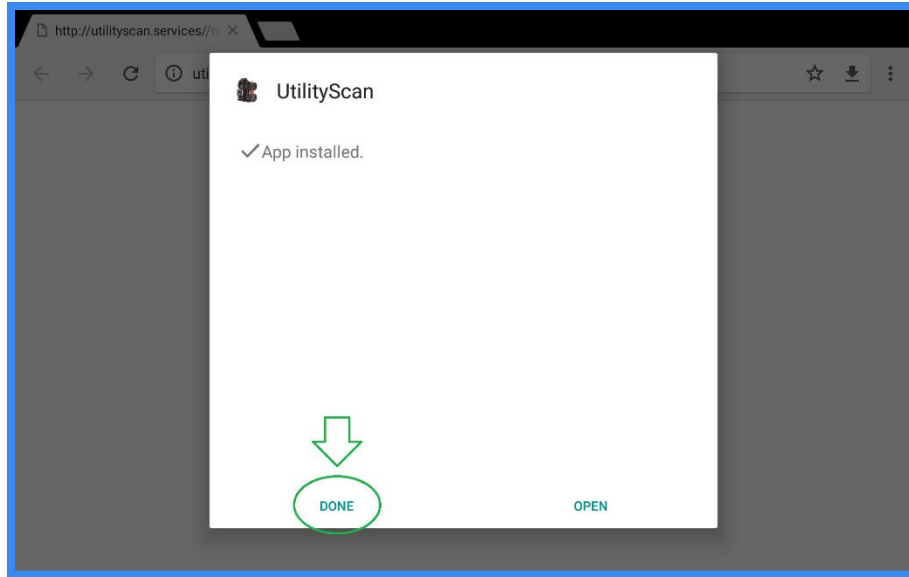

Also, you can verify and open downloaded file by swiping down the top notification bar.

4) When prompted press **INSTALL** to install application update.

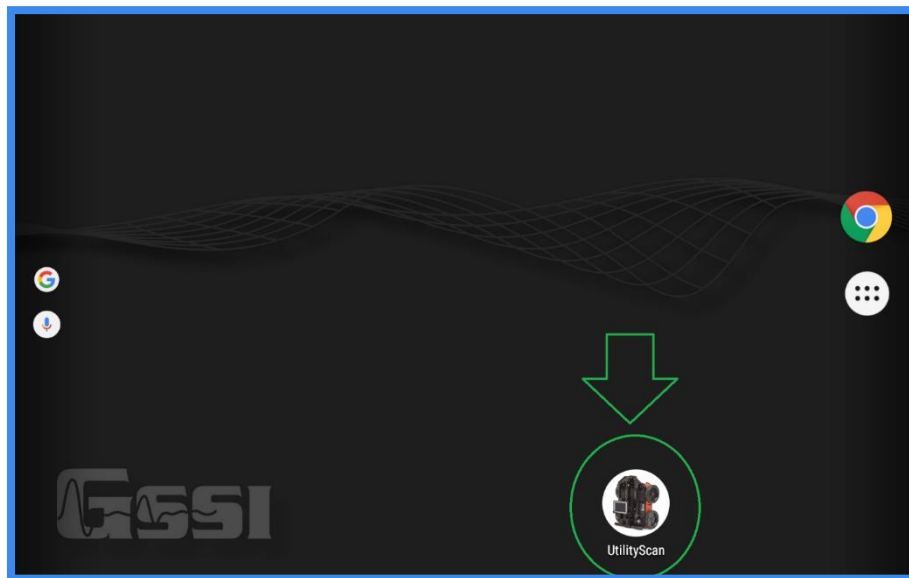

5) After install completes, press done to exit.

- 6) Before opening UtilityScan application, make sure to **Disconnect from the Internet connection.**

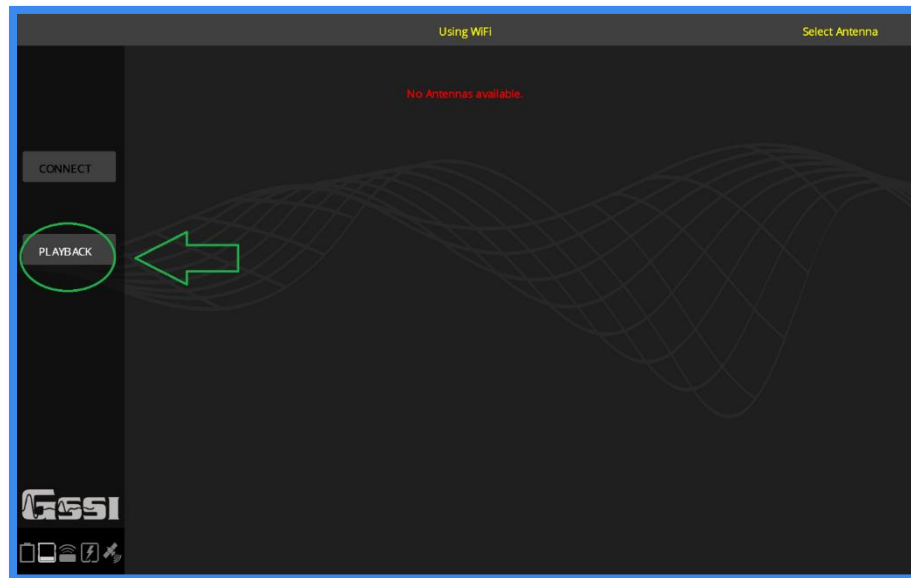

### Verify Update

- 1) Open UtilityScan application. (you do not need your antenna powered on)

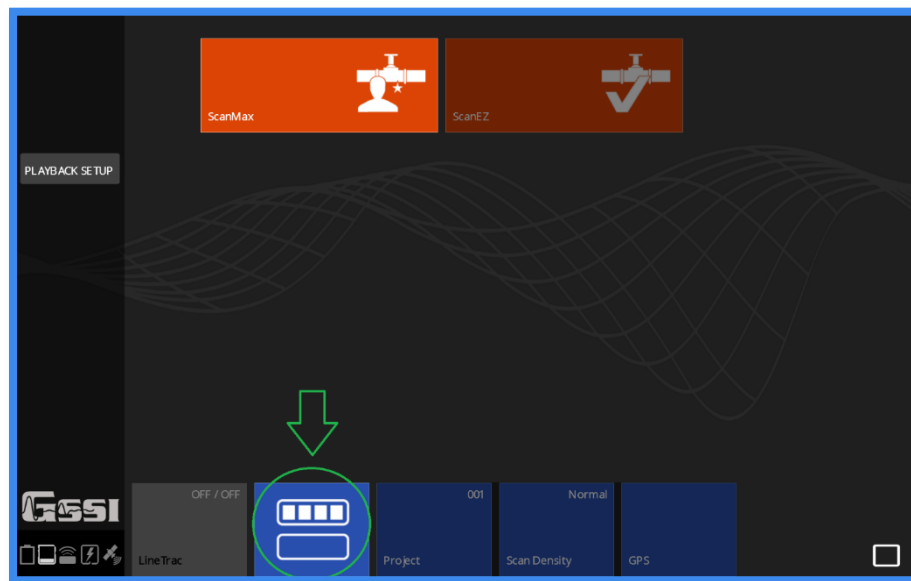

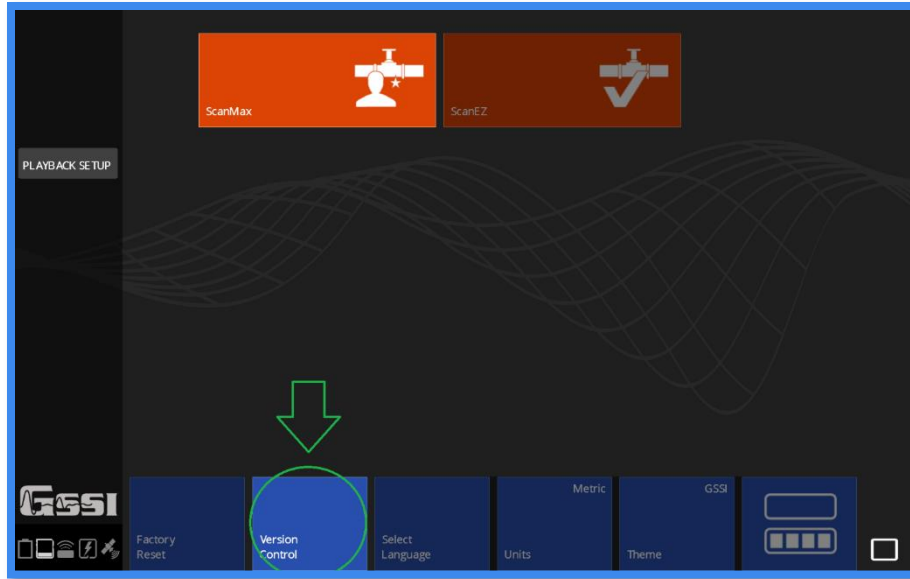

## 2) Select Playback

## 3) Navigate to ScanMAX and change to button row menu item, then press button to select the lower menu carousel.

## 4) Navigate through lower carousel menu items and select Version Control.

5) Verify User Interface is Version 1.3.16.
