

# UtilityScan<sup>®</sup>

## Software Version 1.4.45

### Installation Instructions

#### Connect Tablet to Internet

1) Connect Tablet to an Internet connection.

*(We recommend connecting the Tablet via ethernet to avoid any issues when re-connecting to your antenna. If you decide to use Wifi, make sure to forget Wifi connection after updating the UtilityScan application)*

1.1 Ethernet Location:

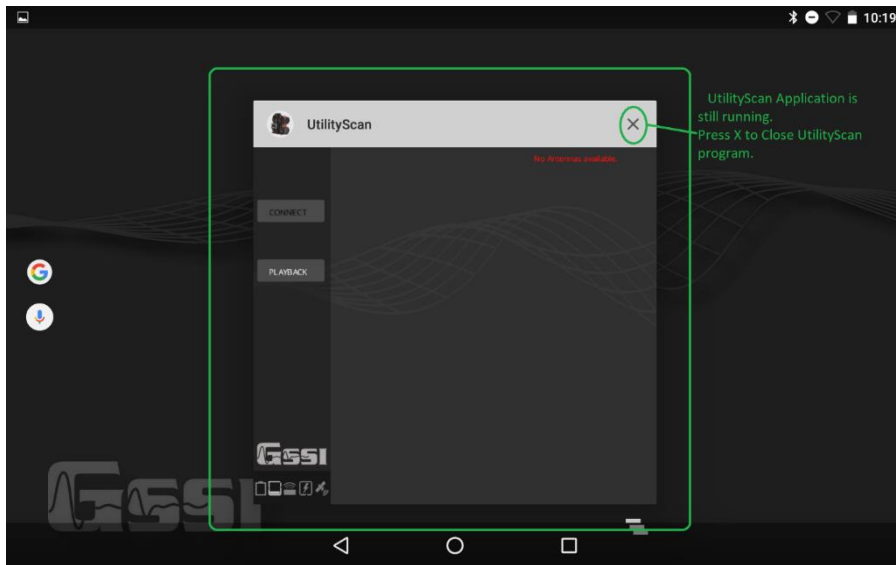

- For Zebra L10 and Panasonic B2: There is a full sized ethernet port on the device
- For Nvidia Shield Use Ethernet to Micro USB adapter supplied with UtilityScan system
- For Lenovo Tab 4 & Panasonic A2 Use Ethernet to USB Type-c supplied with UtilityScan system

#### Make Sure UtilityScan Application is Closed

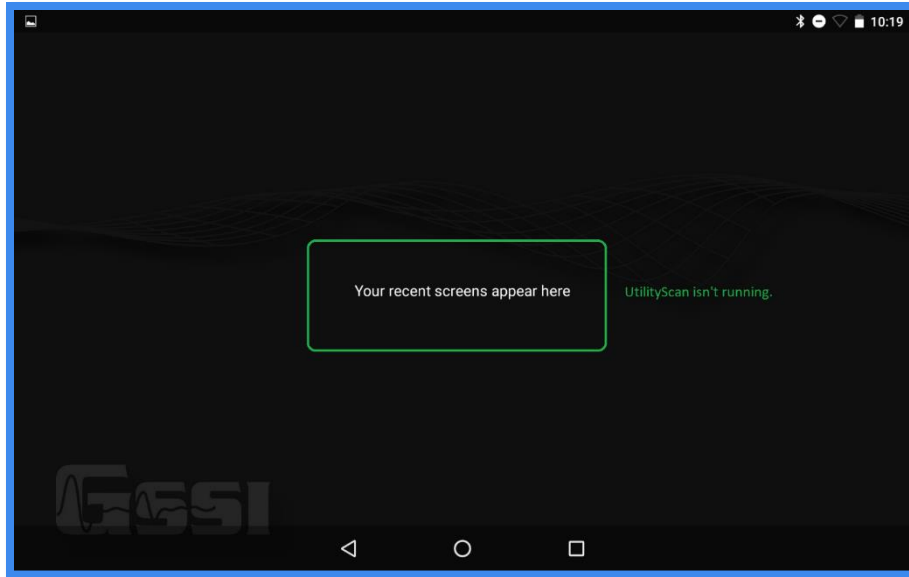

1) When on Home Screen press the square button on the bottom Navigation bar. *(If you don't see the square button, swipe up from bottom of the screen to reveal navigation bar)*

2) Make sure UtilityScan isn't open. If UtilityScan is open and running, make sure to X out program to stop UtilityScan before continuing.

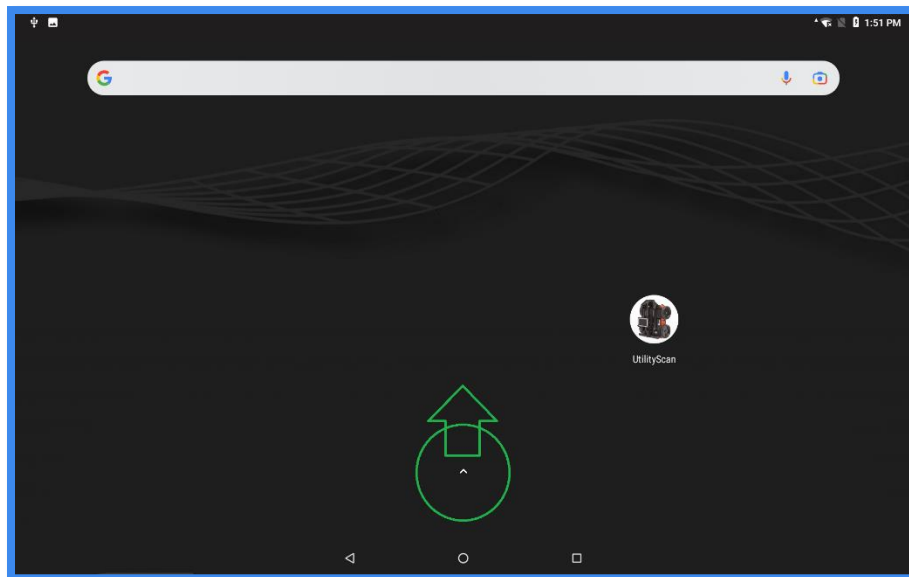

*UtilityScan application is still running. Close out program before continuing.*

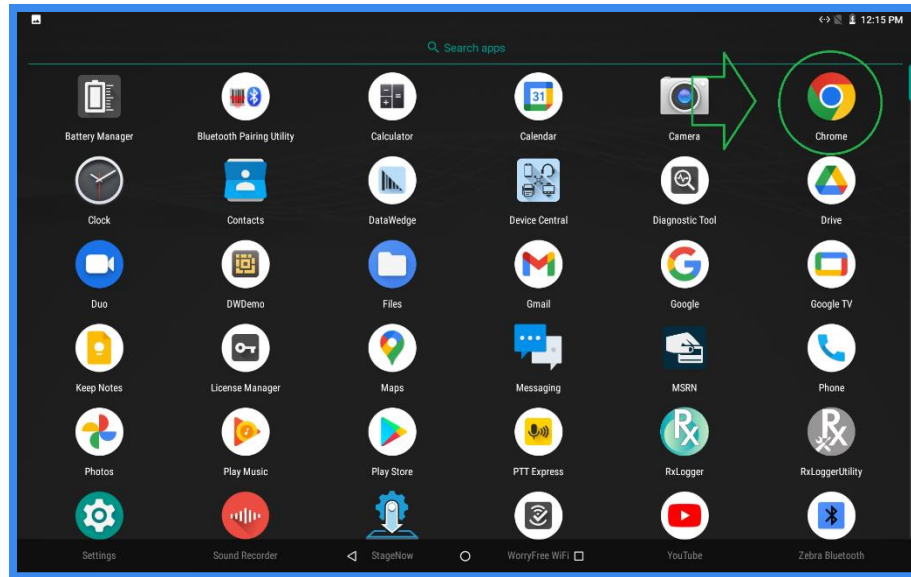

*UtilityScan application is not running. Good to continue.*

## Open Google Chrome Browser

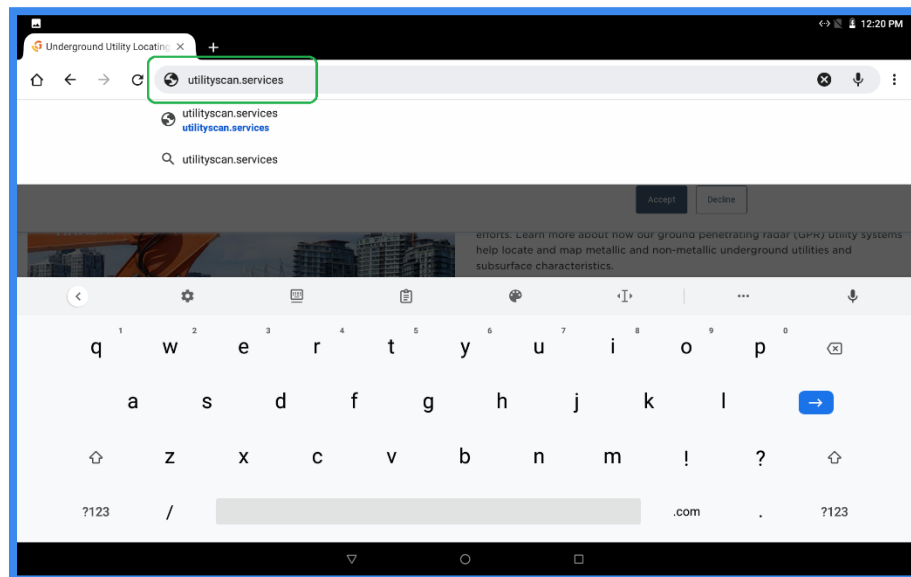

- 1) Swipe up to open Applications menu to navigate through installed applications on your Android device.

- 2) Click on the Google Chrome icon to launch the web browser.

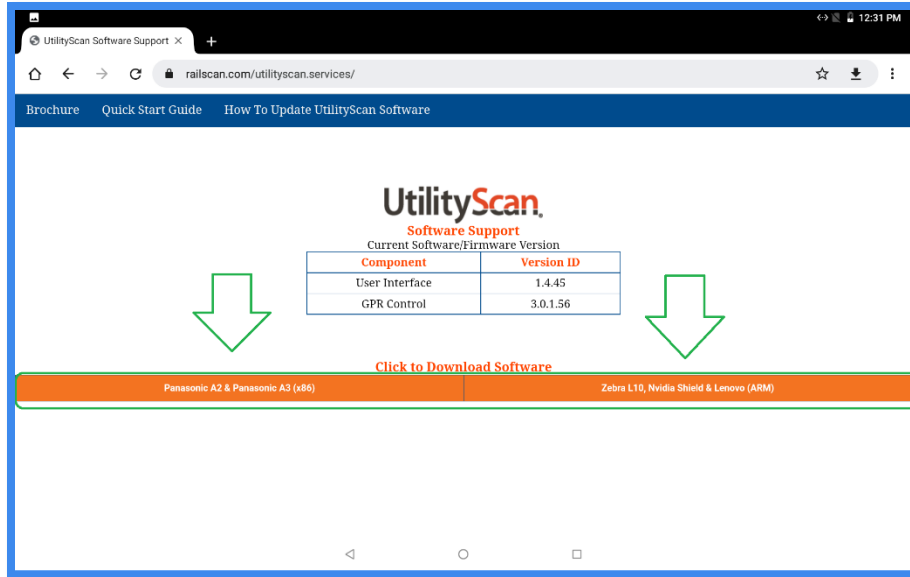

3) Enter UtilityScan.services in the address bar

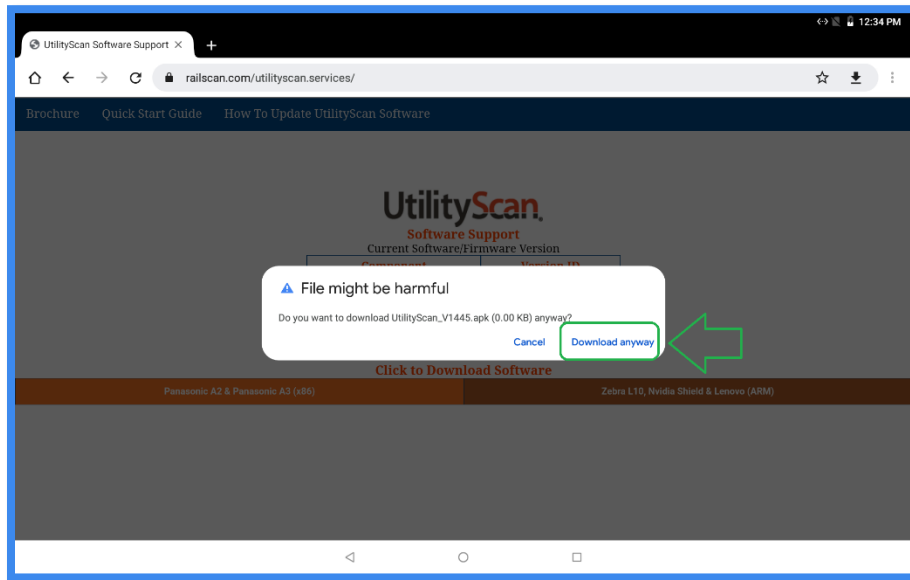

## Installing UtilityScan Application Update

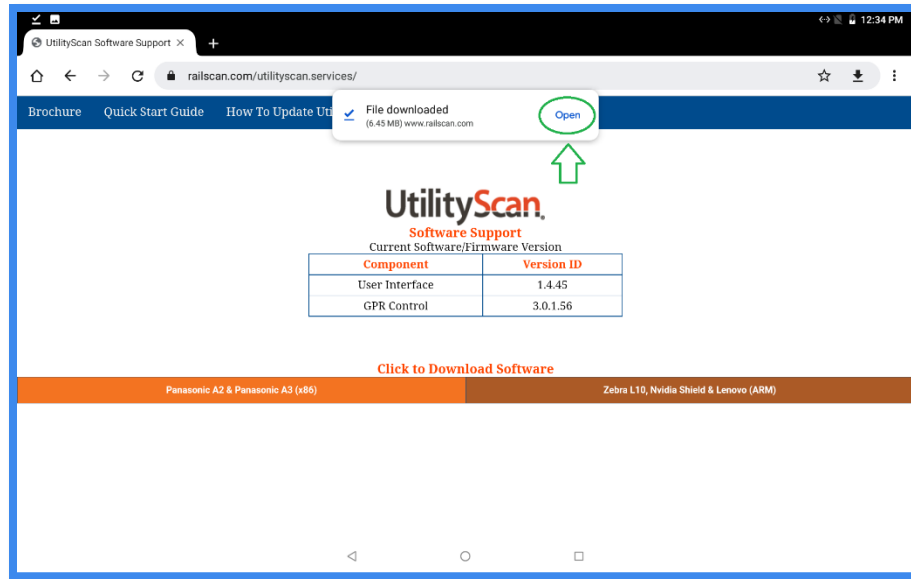

1) Press button to download software, depending on what tablet you're using. If you are unsure of your tablet model, check the front bezel or back of the device for identification info.

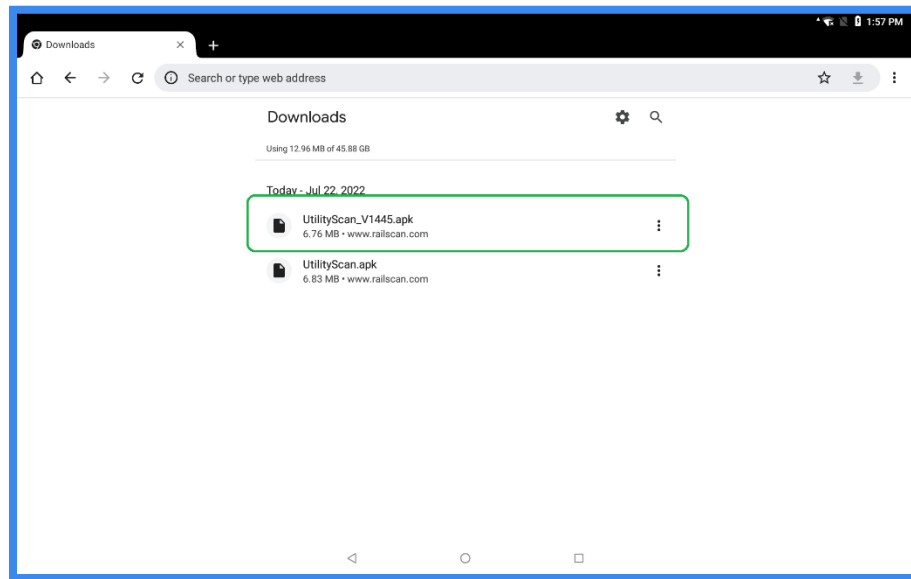

2) Press 'Download Anyway' when prompted to start download.

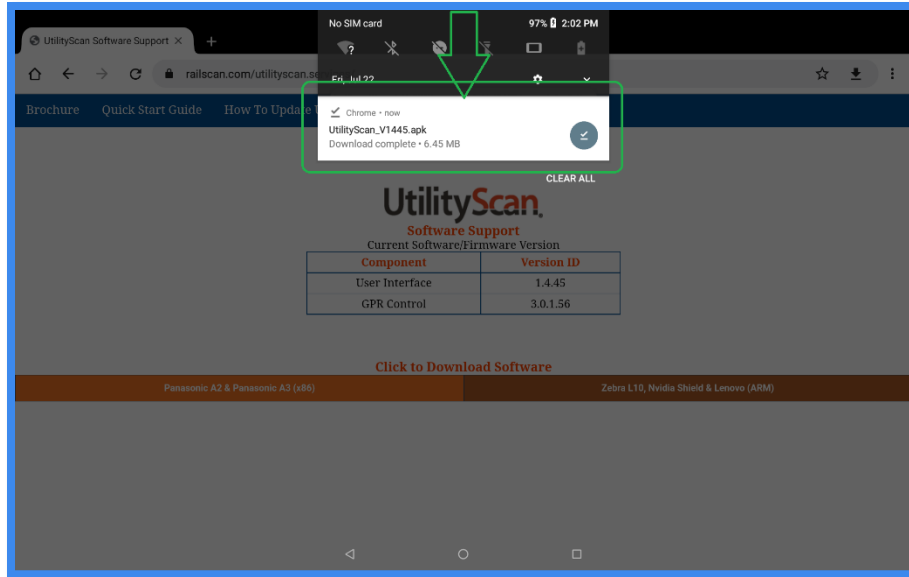

3) Once download completes press OPEN to start installation.

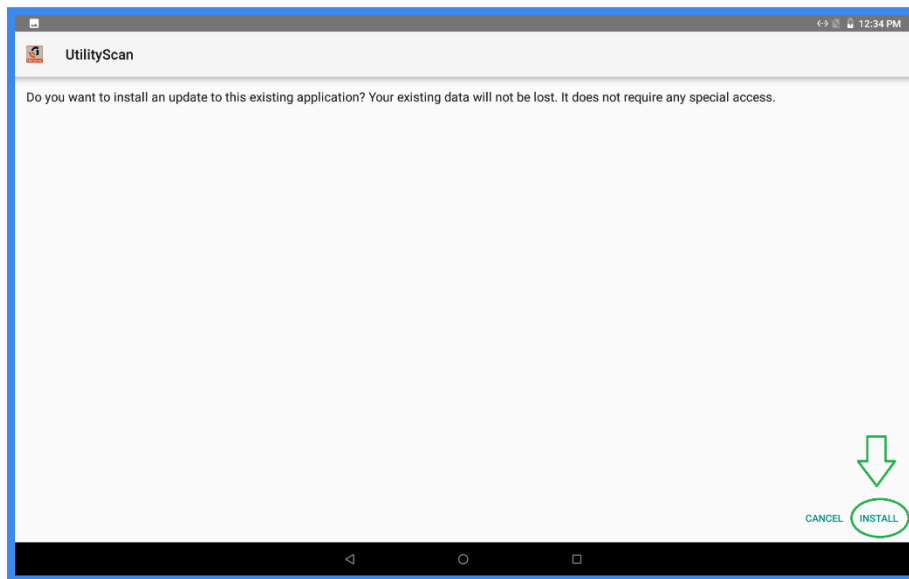

*Notes: You may be brought to the Downloads folder after hitting the 'Open' Text. Select the UtilityScan\_V1445.apk*

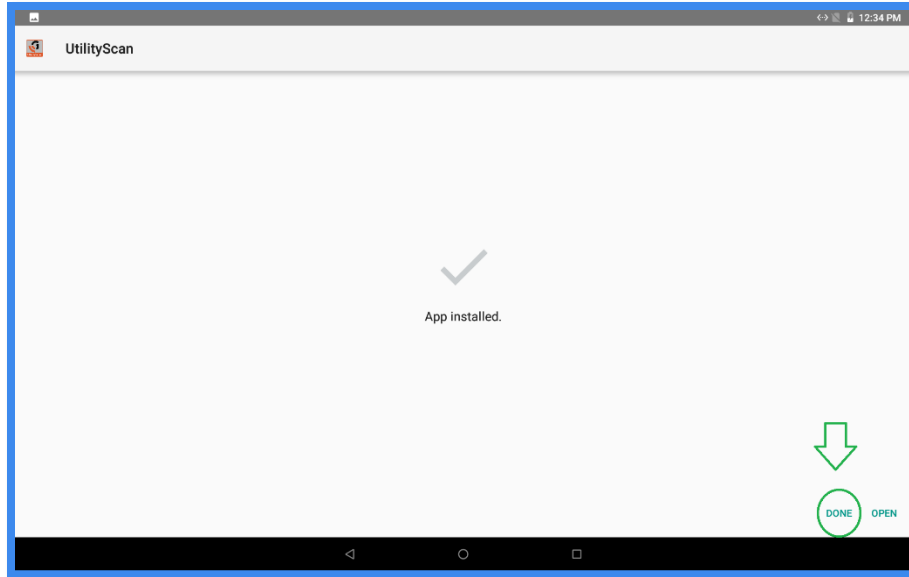

Also, you can verify and open downloaded file by swiping down the top notification bar.

4) When prompted select 'INSTALL' to install application update.

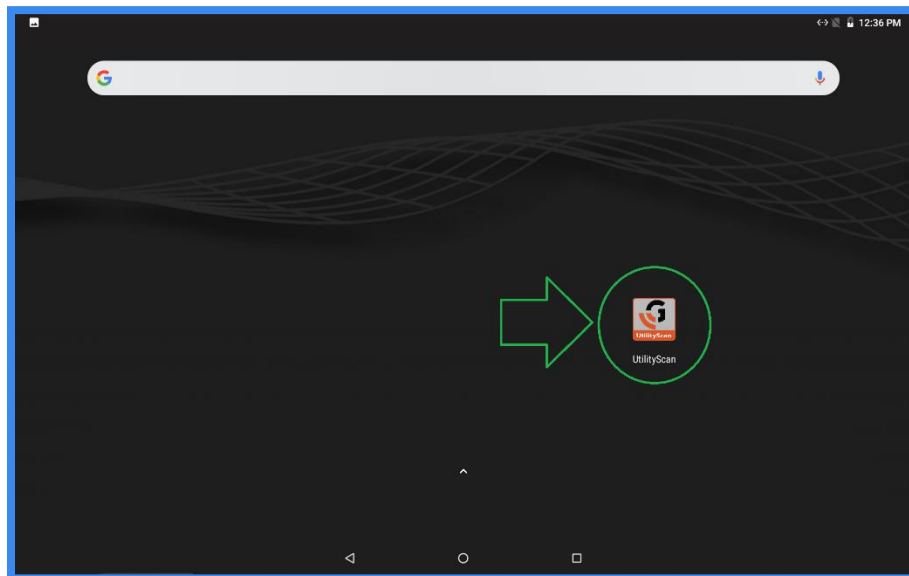

5) After install completes, press 'DONE' to exit.

- 6) Before opening UtilityScan application, make sure to **Disconnect from the Internet connection.**

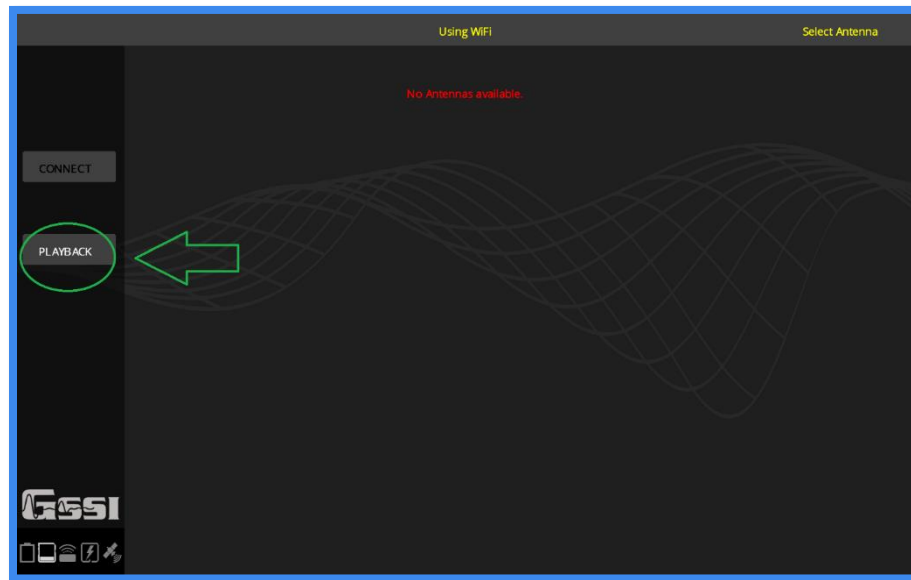

### Verify Update

- 1) Open UtilityScan application. (You do not need your antenna powered on)

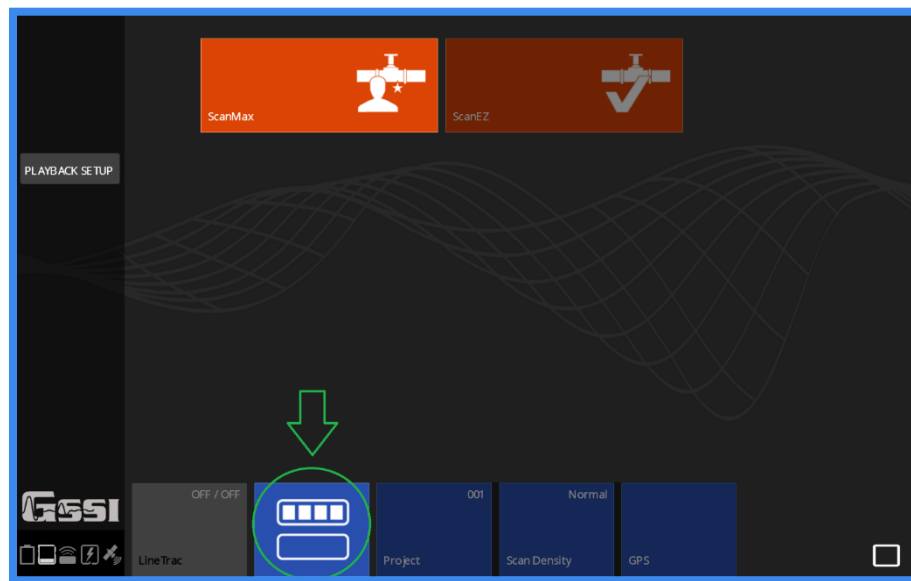

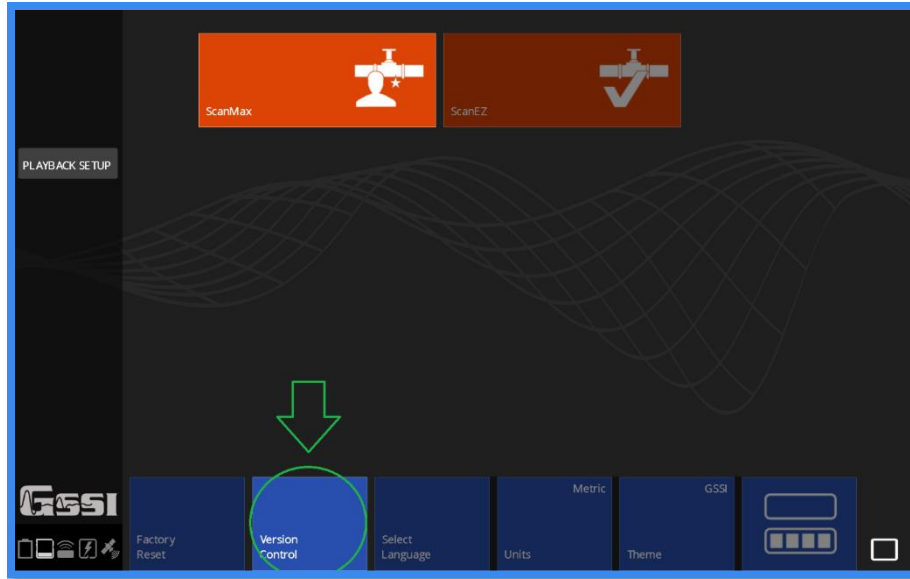

## 2) Select Playback

3) Navigate to ScanMAX and change to button row menu item, then press button to select the lower menu carousel.

4) Navigate the lower carousel menu items and select Version Control.

5) Verify User Interface is Version 1.4.45.

Component	Version ID	Date Modified	Selected
